

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
WASHINGTON 25, D. C.

IN REPLY REFER TO:
D30-D

MAY 13 1967

Mr. A. C. Clark, Assistant Commissioner
for Operations
Bureau of Public Roads
Washington 25, D. C.

Dear Mr. Clark:

Your letter of April 11 has been received transmitting the title sheet tracing for George Washington Memorial Parkway Project 1A9, 1A10, Abutment, Piers and Superstructures for the Glebe Road and Pimmit Run Structures in Arlington and Fairfax Counties, Virginia.

The title sheet has been signed by the Chief, Division of Design and Construction, and the undersigned, and is returned herewith in accordance with your request.

We understand the retaining wall at the east abutment of the Glebe Road structure has been deleted from the drawings and a 2:1 slope will be substituted when the work road is abandoned and obliterated upon completion of the contract. Since this work road is for the convenience of the contractor in obtaining access to part of the site, the necessity for the retaining wall was questioned in Assistant Superintendent Gartside's letter to Mr. Spelman of April 26.

Funds for this work have been made available to this Service by the Central Intelligence Agency and advertisement for bids may proceed immediately.

Sincerely yours,

(SGD.) CONRAD L. WIRTH

Director

Enclosure
